Laser Self-Lam Labels

Self-Laminating Wire/Cable Labels

- Clear tail overlays print
- Easy to use software program
- Prints on existing laser printer
- Economical and fast
- Acrylic adhesive
- Oil, water and solvent resistant
- Prints on demand, on the job site
- Easy inputting or downloading of data

Polyester film self-laminating labels are used in cable shops, industrial controls, electrical contractors, and telecommunications. Impact, Inc.'s Windows software is all that is needed, along with existing laser printer, to create self-lam markers on demand at the job site. Simple inputting or downloading of data produces quick and permanent markers. Labels are provided on a single sheet, 8.5" x 11" format. Available in packs of 50 sheets or 100 sheets.
